DECISION TREE-
Tanzania Wazazi Nipendeni Campaign
MALARIA IN PREGRANCY –MEN GROUP

Later attendants, more than 20 weeks

Step 1a. to hide information about pregnancy
-it is a first time to get pregnant
- don't believe if she has pregnant

Pregnancy

Early attendants, less than 20 weeks.

Step1b. to inform his partner about the pregnancy
-he is the one concern with it
-he is responsible for it
-he is close to me
-he is trouble maker if he is not aware

Step 2. to confirm about the pregnancy
-to go to the hospital to check the presence of pregnancy
- or to buy pregnancy test from shop

Step 3. to tell your partner about the presence of pregnancy
-to give him the pregnancy test result

Step 4. to decice about to go to the clinic
-a husband is a decision maker
-a husband advise on going to the clinic to collect a clinic card
-to avoid some problems

Step 9. to deliver
- to deliver either in the hospital or home
- -hospital is more safe for the health of the babe and mother
- -to deliver at home with the assistance of traditional birth attendants.

step 8. to attend clinic for the second time.
-to get test
-to check the development of the babe
-to get the second dosage of SP after one or two months
