or couple's life stage. **POLICY AND** REGULATORY **FRAMEWORK** 

**Ukrainians** reached with behavior change communication messages about family planning and reproductive health.

family planning and reproductive health curricula/ guidelines/clinical protocols were developed, updated, and approved by relevant government institutions.

**BEHAVIOR CHANGE** COMMUNICATIONS HWUP addresses constraints that prevent couples from making informed family planning and reproductive health choices, such as lack of information,

knowledge, and access to modern family planning methods. HWUP provides couples with access to evidence-based information about the safety, effectiveness, and correct use of contraception

appropriate for each individual's

The number of access points for family planning and reproductive health services increased in HWUP partner oblasts

health providers from perinatal centers trained on postpartum and post abortion family planning.

Seminars with **National FP** Center

advocacy meetings conducted with oblast coordinating committees to gain more support for family planning within oblast reproductive health programs.

advocacy

workshops addressing equal access to family planning and reproductive health services held at the regional level for policy makers in collaboration with UNFPA.
